

[BioStar 2](#), [Biomini](#)

When you cannot enroll a fingerprint with Biomini on BioStar 2

This article is outdated.

For an updated guide refer to the following link [Troubleshooting Biomini Issues](#)

In this document, we would like to introduce how to troubleshoot when you experience problem enrolling a fingerprint using Biomini on BioStar 2 Server.

Before we begin, we assume you have installed [Sup_Fingerprint_Driver](#) and as a result of that the device can be found on BioStar 2 device list as well as Windows Device Manager.

Cause

This issue can occur when the BioMini-Agent.exe*32 process is running with insufficient access

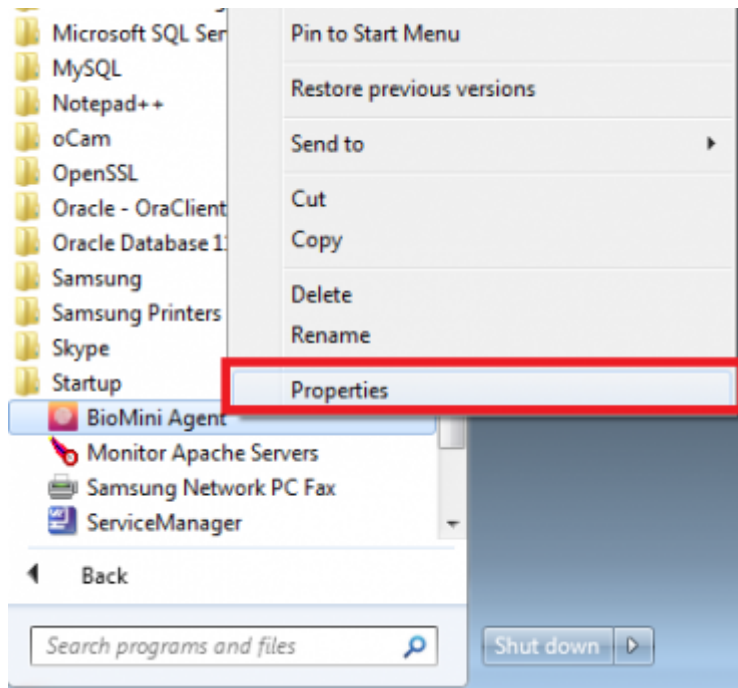

privileges.

Resolution

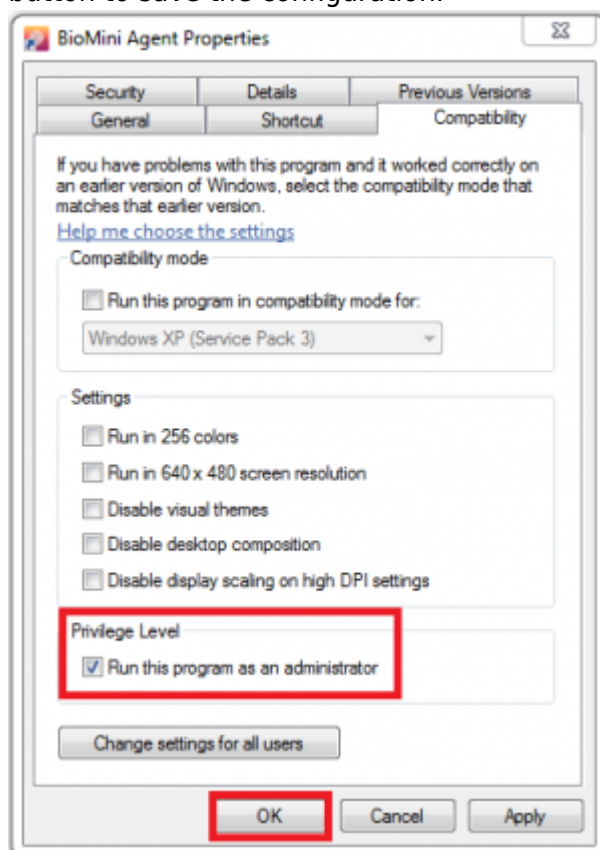

1. Run "Windows Task manager". Please terminate the "BioMini-Agent.exe*32" process.

2. Go to Windows **Start** > **All Programs** > Startup and right-click BioMini Agent then select Properties.

3. On the Compatibility tab, please enable Run this program as an administrator option then click **OK** button to save the configuration.
